

RURAL ACTION MOVEMENT (QUEENSLAND)

POLICY STATEMENT

The **Rural Action Movement (Queensland)** upholds every Australian's right to create and provide... without this right being controlled by outside vested interests.

Therefore, our aims include:

- Reinststate 'Sovereign Credit' as per the original charter of the Commonwealth Bank of 1912 so as the Federal Government can issue the necessary low cost credit for industry, housing and, where required, debt free credit for public infrastructure.
- Total re-regulation of the private banking sectors, so as the Federal Government controls the issue of 'Credit' for the benefit of all Australians
- Protect and revitalise Australia's Industry by halting tariff reductions and where necessary reinstate prudently
- Implement a moratorium on domestic and foreign bank debts
- An immediate halt to the sale of all Australian owned public utilities and assets, and introduce policies to rescind foreign ownership of all such entities already privatised and restore rightful ownership to the control of the Australian people
- Restore public services such as health, education, energy and water supplies so as no Australian is disadvantaged
- Guaranteed minimum income and guaranteed minimum price scheme to ensure a safety net for all Australians
- Create co-operative marketing and distribution agencies, with parity pricing for primary produce, under the control of the producers
- Immediately review of all international covenants and treaties signed and ratified by non-elected bureaucrats or politicians, without approval of Australian Parliaments
- Seek and co-operate with like-minded organisations and individuals

These aims will be reviewed and updated regularly with prudent amendments and additions being considered.
